

MEASURING LEARNING PROGRESS VIA LIVE DASHBOARD

Turning Learning into Measurable Growth

Leadership development should deliver more than inspiration. It should deliver results.

Our Result-Based Development Programs are designed to track not only participation, but real growth in the skills and behaviours that matter most to your organisation.

Using live leadership dashboards, progress becomes visible at both the individual and organisational level.

Dimensions measured are customisable, ensuring alignment with your unique priorities, from communication and leadership behaviours to industry-specific competencies.

KEY TAKEAWAY

- ✓ A result-based framework that links learning directly to measurable outcomes.
- ✓ Customised dimensions such as communication, leadership, and functional competencies.
- ✓ Integrated tracking across pre/post assessments, peer reviews, action learning projects, and trainer evaluations.
- ✓ Clear visualisation of progress through graphs, radar charts, progress bars, and comparisons.
- ✓ Role-based access: participants see their journey, HR and leaders see cohort-level impact.

LEARNING PROGRESS LIVE DASHBOARD

What Makes This Different

Unlike traditional training evaluations, our result-based programs integrate custom metrics, live dashboards, and experiential feedback loops. The result is a leadership journey that is both human-centred and data-driven. Ensuring that development is not only inspiring but also accountable to business priorities.

EXPECTED RESULTS

- Transparent evidence of leadership growth at the individual, team, and organisational levels.
- HR and leaders gain data to make succession and promotion decisions with confidence.
- Participants are motivated by seeing their progress in real time.
- Trainers and facilitators can adapt programs dynamically based on live feedback.
- Organisations can clearly demonstrate ROI from leadership development investments.

Proof of Impact

Applied in leadership journeys across multiple industries, this approach has tracked thousands of learning data points, enabling organisations to strengthen communication, sharpen leadership, and accelerate competency development while proving tangible business outcomes.
