

LEADERSHIP SIMULATION
THE FORGOTTEN ISLAND

Every organisation is like a living ecosystem. Teams are asked to grow with limited resources, adapt to constant change, and still deliver results in the face of uncertainty. Yet too often, people retreat into silos, compete instead of collaborate, or chase short-term wins that undermine long-term success. The question is, can your team rise above the chaos, build trust, and chart a path forward together?

KEY TAKEAWAY

- Discover how to collaborate under pressure and break through silos.
- Sharpen their negotiation and influence skills in real-time, high-stakes exchanges.
- Practice strategic thinking by weighing immediate needs against long-term survival.
- Strengthen their ability to make decisions with limited information and high uncertainty.
- Experience firsthand the power of trust, empathy, and alliances in achieving lasting success.
- Draw clear parallels between their choices and the everyday challenges of organisational life.

WHAT IS THE FORGOTTEN ISLAND?

It is an intense and immersive leadership simulation that drops you and your team into the heart of an untamed world. Here, you become a tribe with your own resources, ambitions, and constraints. The island is rich with opportunity but filled with challenges: rival tribes, scarce resources, fragile alliances, and tough decisions. Every move you make is a test of strategy, influence, and teamwork.

THE MISSION

Your tribe's destiny is in your hands. To survive and thrive on The Forgotten Island, you must claim territories, secure resources, trade wisely, and negotiate fiercely. But success isn't just about what your team can grab — it's about the relationships you build, the risks you take, and the bigger vision you pursue. Will you emerge as a trusted ally, a powerful negotiator, or a dominant force? The island will reveal the truth.

WHAT MAKES THIS DIFFERENT?

This is not a classroom lecture or a set of slides — it's an adventure you live. The Forgotten Island surfaces authentic behaviours that no training manual can replicate. Leaders emerge, conflicts flare, alliances shift — just like in the real workplace. And when the simulation ends, a powerful debriefing connects the dots, turning the heat of the island into lasting lessons about leadership, collaboration, and performance.

PROOF OF IMPACT

The Forgotten Island has already been experienced by more than 500 participants across industries. Time and again, leaders and teams walk away with powerful insights, stronger connections, and practical strategies they can immediately apply back at work. The simulation consistently delivers high engagement and lasting impact — proving that learning through lived experience creates the deepest transformation.
